## **LABEL-AIRE INLINE 5100 & INLINE 6200 LABELING SYSTEMS**

Label-Aire is proud to introduce the newest additions to its line of advanced pressure-sensitive labeling systems. The NEW Label-Aire® *Inline 5100 and Inline 6200 Labeling Systems* represent the pinnacle in advanced stainless steel labeling systems.

### **Inline 5100 Labeling System**

The NEW advanced Inline 5100 is a rugged stainless steel cabinet based (including frame and side plates) labeling system that can be outfitted with Label-Aire's full range of Label-Aire New Generation 3100/3000 Series applicators (wipe-on, air-blow, tamp-blow). The Inline 5100 also has a smooth-running Variable Frequency Drive (VFD) conveyor which improves label placement accuracy. For added convenience, the 5100 automatically spaces products and has a user-friendly operator interface. Designed for reliable full- and partial wrap labeling at medium- to high speeds, high-volume, multi-shift operations, the tough and advanced Inline 5100 delivers at an affordable price.

### **Inline 6200 Labeling System**

The NEW advanced yet rugged Inline 6200 labeling system is a stainless steel cabinet based PLC-controlled labeling system designed for heavy duty front/back-, side panel-, or wrap labeling applications. Among its standard features are a rotating control panel, a 12 foot (3,658 mm) delrin chain conveyor with stainless steel side plates, and a segmented top trap hold down to keep your products in place. Other standard features include Automatic Speed Following (ASF) for product surface profiling, Variable Frequency Drive (VFD), and dual applicator mounts with in/out traverse, up/down, with tilt adjustments for maximum versatility. Standard speeds up to 2,000 inches (50.8 m) per minute with VFD make the 6200 the ideal choice for demanding applications requiring speed and precision. The 6200's long list of options include a choice of Label-Aire New Generation 3100/3000 Series applicators (wipe-on, air-blow, or tamp-blow), wrap belt, single or dual feedscrews, stainless steel side plates, stainless steel frame, stainless steel cabinet, airfill capability, and powered or non-powered impressors.
